

Key changes in the curriculum of FOOD programme in 2023-26

- Advanced studies are same to all 60 cr without main module, as those where earlier 85 cr including main module, 25 cr .
- Four main modules instead of five: Meat Science and Technology is changed as secondary module and scope of the module changes from 25 cr to 20 cr
- Two new secondary modules: Food Packaging, 20 cr and Sensory Food Science, 20 cr
- Master's thesis is possible to do in addition to main modules also in four secondary modules.
- New path from the Bachelor's programme in Chemistry. Prerequisite is that ETK-004 is completed at the bachelor level. Joint quota for all option programmes with separate registration is 10 students/year.
- Removed courses:
 - FOOD-113 Meat Science lectures, 5 cr
 - FOOD-802 Meat Science, lab work, 5 cr
 - FOOD-803 Meat Technology processing lab, 5 cr
- New courses:
 - FOOD-130 Meat and Meat Analog Science and Technology, 4 cr (correction of an error in the credits on 29.6.2023)
 - FOOD-805 Meat Science and Technology, lab, 5 cr
 - FOOD-120S Working in a Research Group in the Senses and Food group, 3 cr
 - FOOD-121S Practical Teaching Training in the Sense and Food group, 2cr
