

CHECKLIST FOR THE APPLICATION FOR AN IMPRIMATUR

Check your manuscript for all of the items below, and enclose the checklist with the application for an imprimatur.

The thesis manuscript fulfils the following requirements:

- In the summarising report, the results are adequately presented and summarised. ☐
- The discussion section is adequate and demonstrates the maturity of the candidate. ☐
- The manuscript meets general standards of academic writing
(overall structure, logical sentence structures, references etc.). ☐
- The structure, form and layout are not unfinished. ☐
- The publication forum of the original articles is of high quality ☐
(the publications are in journals with Publication Forum level or they have been checked
otherwise and are not in so called predator-journals)

If the dissertation involves animal experiments:

- I have done animal experiments. ☐
- I have completed the laboratory animal course. ☐

The proposed examiners and opponent fulfil the following requirements:

- The examiners and opponent are proposed by the coordinating academic,
who is employed by the Faculty. In the Faculty of Medicine professors, associate
professors and docents may act as the coordinating academics for doctoral
candidates (a docent contract alone is not enough). ☐
- The proposed examiners are docents or professors. ☐
- They do not have any co-authored publications with the doctoral candidate. ☐
- They do not work closely with or under the supervisor(s), and they do not have
any close co-operation (several recent publications) with the supervisor(s). ☐
